Jacob Homanics

Software Engineer | Web · iOS/Android · Native · VR/AR · Video Games · Blockchain App & Infrastructure

SUMMARY

AI-empowered software engineer with 10+ years of experience taking products from 0 to 1. Skilled at working with fast-moving startups and small teams, making product decisions, and adapting to evolving business needs. Stays at the forefront of emerging technologies, including AI, to build innovative, scalable solutions.

EXPERIENCE

Disgo · Head of Engineering
Austin, TX · Hybrid · Aug 2025 – Present

- Led engineering and technical strategy for Disgo, a consumer-focused social discovery platform, and Bartynder, a B2B2C platform connecting hospitality businesses with their customers.
- Architected and developed 2 cross-platform mobile applications using React Native, Expo, TypeScript, and modern backend technologies using Convex, serving 800+ users.
- Collaborated with 5 design partners and supported the onboarding of 10+ venues, translating business requirements and customer feedback into product features.

CarStarz · Supporting Engineer
Remote · Jan 2026 – Apr 2026

- Designed and implemented a Progressive Web App prototype.
- Integrated Privy for user sign-in and server-side access for wallet transactions.
- Implemented Ethereum Attestation Service for on-chain verifiability of car records.

Agora · Full-stack Developer
Remote · Dec 2024 – Feb 2025

- Built a web application submission process for open-source software contributions using Next.js and PostgreSQL.
- Rewarded 250+ developers through the platform.

Bigshot Toyworks · Full-stack Developer
Remote · Jul 2024 – Dec 2024

- Developed interconnected software products that collectively generated over $60K in revenue.

ATX DAO · Open Source Developer
Austin, TX · Jan 2023 – Jul 2024

- Secured a $60K grant to develop the Reputation & Roles Starter Kit, an open-source framework for tracking and rewarding trust between individuals and organizations.

Project Venkman · Blockchain Integrations Engineer
Austin, TX · Jan 2022 – Jan 2023

- Engineered and deployed Ethereum smart contracts for the Bill Murray 1000 collection, contributing to a product that attracted 500+ unique users and generated $240K+ in revenue.
- Helped resolve critical technical challenges during a high-stakes product launch, coordinating with internal engineering teams and Coinbase to deliver a successful release.

Independent Developer · Self-employed
Aug 2019 – Jan 2022

- Developed 3 arcade-style mobile games for iOS and Android, web-based RPGs, and 5 Unity Asset Store tools.

Brandgage · Unity Developer
Pittsburgh, PA · Nov 2017 – Aug 2019

- Developed interactive applications, video games, and immersive VR/AR experiences showcased at multiple pharmaceutical conferences.

Bayer · Software Technician
Indianola, PA · Mar 2017 – Oct 2017

- Tested software and hardware functionality to identify defects and performance issues.
