EXPERIENCE

Disgo, Remote — Chief Technology Officer

JULY 2025 - Current

Leading end-to-end engineering for two cross-platform applications (iOS, Android, and Web), overseeing architecture, feature development, deployment, and maintenance while supporting 700+ users and generating recurring revenue.

CarStarz, Remote — Supporting Engineer

JANUARY 2026 - APRIL 2026

Designed and implemented a Progressive Web App prototype that integrated Privy for user sign-in, server-side access for wallet transactions, and implemented Ethereum Attestation service to provide on-chain verifiability for car records.

Gems, Remote — Full-stack Developer

JUNE 2025 - MAY 2026

Built a social crypto platform forked from Bluesky that leveraged Privy for user sign-in, in-app swaps, ERC20 transfers, and NFT transfers.

Optimism, Remote — Full-stack Developer

MARCH 2025 - October 2025

Built the first Superchain Interoperable governance voting platform while participating in the Superchain Interop Incubator Program directly run by Optimism.

Agora, Remote — Full-stack Developer

DECEMBER 2024 - FEBRUARY 2025

Rewarded 250+ developers.

Built web application submission process for contributions to open-source software using NextJS and PostgreSQL.

ATX DAO, Austin TX — Full-stack Developer

JANUARY 2023 - JULY 2024

\$60k grant to build an open-source toolkit that tracks trust onchain.

SKILLS

AI/LLMs, Prompt Engineering, ChatGPT, Claude 3.5, Claude 3.7, Claude 4.0

Web Development

TypeScript, JavaScript, NodeJS, React, NextJS, HTML, CSS, Expo

Convex, MongoDB, Prisma, PostgreSQL

Viem, Wagmi, Ethers

Smart Contracts

Solidity, Foundry, Hardhat

Game Development

Unity Game Engine, C#

EDUCATION

Pittsburgh Technical College

Robinson PA 2015 -2017

Associates in Information Science
